Sir:

Applicants draw the examiner's attention to the documents listed on the accompanying Form PTO-1449:

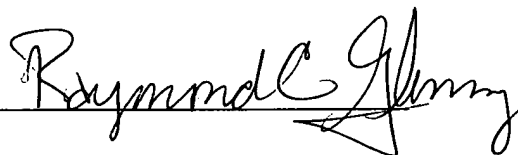

- The **Weldon *et al.*** reference is discussed in the *Background* section of the captioned patent application; part of the reference is illustrated in Applicants' "Prior Art" FIG. 1.
- The **Magoon *et al.*** reference uses a higher VCO frequency with a frequency divider and signal summation, to construct a pseudo-sinusoidal LO wave (Fig. 8) having reduced harmonic content; similar to the Weldon *et al.* reference, Magoon's approach has a high VCO frequency and a limited number of LO phases.

Applicants request that the examiner initial the space adjacent the documents on the accompanying Form PTO-1449 to indicate official consideration of the documents, and mail the initialed Form PTO-1449 to the correspondence address of record.

Respectfully submitted,

Date: March 29, 2004
